Availability: Available for remote work, freelance, collaborations and projects.

PROFILE

I'm a programming technician and software developer. I build tools for problems I know up close: my main project started in the restaurant where I work, which is where I learned to read a business before writing code. I'm looking for my first role in tech.

PROJECTS

La Nueva Goleta Administración Working pilot

Internal platform for invoices, suppliers, prices, cash and expenses, with OCR reading and human review.

357 automated tests passing over extraction, matching and invoicing.

Python · Django · SQLite · OCR · HTML / CSS · Git

SKILLS

Applied development · Python · Django · HTML and CSS · Django templates · SQLite · Git and GitHub · Visual Studio Code · OCR and document processing

Product and AI · Problem analysis · Requirements definition · Flow design · User experience · Validation and testing · Prompting · Claude Code · Generative AI tools

Currently exploring · SQL / PostgreSQL · APIs · Supabase · Vercel · TypeScript · Next.js

EXPERIENCE

Manager, responsible for operations and digitalisation · La Nueva Goleta 2024 — Present · 3 seasons
Cullera, Valencia, Spain

- Designed and built the internal admin platform the restaurant uses today.
- Digitalised invoice entry, price control, cash handling and expense records.

Management, organisation and digitalisation · Hostelería MDQ 2021 — Present · 6 seasons
Argentina and Spain

- Digitalised administrative processes and built internal management tools.

EDUCATION

Técnico en Programación (programming technician) August 2020 — December 2025
UCAECE Mar del Plata · Mar del Plata, Argentina · Completed
